Residually finite properties of soluble groups of finite rank. (Chinese. English summary)

Acta Math. Sin. 43, No.1, 163-166 (2000). [ISSN 0583-1431]

Summary: We give some residually finite properties of soluble groups of finite rank, which are generalizations of theorems of Shmelkin and others.

AMS subject classification: 20F16;20E26

Keywords: soluble groups of finite rank; residually finite groups
